PRESIDENT'S MESSAGE

Dear Friends,

Happy New Year, Everybody! I hope you all had a relaxing Christmas/Holiday season and are refreshed and ready to jump into 2022! As always, thank you to our monthly sponsors! Without you, this great organization would not exist.

I think the last 24 months have given us a lot of insight into our industry and the people in it. It's resourceful, adaptable, resilient, and always crazy. I don't know about you, but I could do with a little less crazy. Unfortunately, I think crazy is going to be around for a while. The never ending saga of Covid, supply chain issues, material shortages, price increases, and labor shortages are all going to be major issues for our industry for the foreseeable future. NUCA of North Florida is here to help you with these issues (and anything else that you can come up with) as best as it can. If you or your business is suffering from anything, share it with our group. Somebody may have an answer or know where to look to get an answer. Don't suffer alone.

We have a lot of to look forward to in 2022. Golf and fishing tournaments, clay shoots, and a host of other fun events. We will continue to put on our popular next man up classes (Covid permitting of course). See Kathy's schedule/list for dates and times. And last but not least, it's an election year! That's right, the mid term elections are here. Make your voice heard with your vote. You can also join me and NUCA of Florida in Tallahassee to walk the halls and tell your representatives what you think about them and their policies.

Before I say goodbye for the month, I want to thank 2 gentlemen for all that they do for this organization. First, Mr. Lauren Atwell for his undying support of NUCA at every level. He has never been afraid to jump in and get his hands dirty, and he has represented us very well as the Chairman of NUCA this past year. And also, Marty Adams for your dedication and support of this organization. Thank you both very much, I look forward to continuing on the path that you both have set before me.

As always, please continue to support our members and associates. If there is anything I can do to help you out, please do not hesitate to give me a call.

Sincerely,

Mike

The Law and Your Business

The Law and Your Business – Workers Compensation Immunity Christian Lake, Esq., Lindell Farson & Zebouni

It is an unfortunate reality that it is often not a question of “if,” but “when” a jobsite injury will occur. As a contractor in Florida, when an employee or subcontractor’s employee is injured on the job, it is important to know the extent of your liability to that individual. Workers compensation exists to, of course, compensate injured workers for many of the financial damages related to their injuries. However, in the case of more severe injuries, workers compensation can stop short of fully compensating the injured worker. In such an instance, the worker may look to sue “upstream” to try to find a party to compensate him/her for the remainder of his/her damages.

Recently, a Florida Court decided a case that dealt with exactly such a scenario. In *Tampa Elec. Co. v. Gasner*, Tampa Electric Company was required to maintain a powerplant and subcontracted that work to Zachry Industrial Inc. Two of Zachry’s employees went to the powerplant to conduct maintenance work and were seriously injured when the door to the condenser unit blew open and a “massive column of water” hit both employees. Both employees received workers compensation benefits from Zachry, but they both had additional financial losses relating to their injuries and sued Tampa Electric to recover those losses.

The Court rejected the employees’ arguments and held that Tampa Electric was protected under Florida’s workers compensation immunity statute. That statute states that when a general contractor subcontracts part, or all, of its contracted work to a subcontractor, all employees of the subcontractor are deemed to be employed by both the subcontractor and the general contractor and are entitled to workers compensation benefits from either in the event of a jobsite injury.

The statute also states that the employee’s right to receive workers compensation benefits from the general contractor or subcontractor is the exclusive remedy against the general contractor and subcontractor (in most instances). This serves to prevent the employee from being able to bring a lawsuit against either the general contractor or the subcontractor for those injuries where workers compensation benefits are available (again, in most instances).

The result of this case is important for contractors and individuals alike when considering their options in the event of a jobsite injury. For the contractor, worker compensation immunity is a valuable protection against litigation and it is important, therefore, to maintain adequate workers compensation insurance in order to benefit from this protection. For the employee, this case makes it clear that you are likely stuck with workers compensation proceeds as against the general contractor and subcontractor if you are injured. Importantly, workers compensation immunity does not apply to the owner or tenant of the property if that owner or tenant is not acting as the general contractor.

If you have questions about how workers compensation immunity could impact you or your business, please contact the law offices of Lindell Farson & Zebouni, P.A.

NUCA Chairman Atwell Testifies To Congress On Business Vaccine Mandates

NUCA's Chairman Lauren Atwell testified at a December 7 Congressional roundtable, informing the House lawmakers the Biden Administration Covid vaccine mandate for private businesses will substantially damage the economic gains promised from their new core infrastructure law.

“The Biden Administration’s Covid vaccine mandates are going to make our industry’s existing workforce labor shortages even worse,” said NUCA's Atwell. Chairman Atwell participated in the Dec. 7 House Transportation & Infrastructure Committee Republican Member Roundtable held to discuss the Biden Administration’s employer vaccine mandate. [Read more here.](#)

Courts Halt Vaccine Mandates For Private Businesses and Federal Contractors

A federal judge in Georgia on December 7 issued a nationwide temporary halt to the Biden Administration's Covid -19 vaccine mandate for federal contractors. This joins the ruling by a Louisiana federal judge on Nov. 6 enjoining the Administration's OSHA standard for vaccine mandates on all U.S. private businesses with more than 100 employees. The nation now awaits the next steps from federal court decisions, which could be issued by the end of the year. It is predicted that eventually the U.S. Supreme Court will take up this issue in 2022 for a final decision. The mandates were scheduled to take effect on Jan. 4, 2022. For the latest news about these mandates and their effect upon the utility construction industry, NUCA's online vaccine mandate resources can be found at NUCA.com/vaxmandate.

811 Emergency: \$61 Billion Lost In System To Protect Underground Utilities

Failures in the nation’s 811 system used to prevent damage to underground utility lines are costing \$61 billion a year in waste and excess costs and creating unnecessary hazards for public safety, particularly in states where the implementation and accountability are most lax, according to a comprehensive independent review released on November 17. Read our [press release here](#).

The Next-Generation NUCA Advantage 401(k) Employee Retirement Program Is Here

NUCA is rolling out another enhanced benefit for members: the NUCA Advantage 401(k) employee retirement program! Many members asked us to add this to our popular membership benefits package to help their business retain key employees and remain competitive in a tight industry job market. NUCA has partnered with Lincoln Financial Group to give members access to pricing and service efficiencies. And if you already have a retirement plan, we can determine if transitioning to the new NUCA Advantage group 401(k) program could better meet your employee's needs. Find out more program details at NUCAAdvantage.com/401k-lincoln.

The NUCA Advantage program can become your 401(k) department, so you can focus on what's profitable--running your business. Please schedule a quick call with advisor Chris Price to learn more & save: 954-625-1531.

NUCA's Annual Convention & Exhibit: Anirbar Basu To Return For Economic Forecast

More than \$200 billion in potential new utility construction industry project resources will be apportioned over the next five years to U.S. states. In his out-of-the-box economic analysis of the utility construction industry, Mr. Anirban Basu will discuss at the 2022 Convention the many factors coming into play over the next few years, including the core infrastructure bill and the historic infrastructure systems funding, ongoing supply-chain issues, and other important factors. Mr. Basu, who serves as chief economist for Associated Builders and Contractors and as chief economic advisor for the Construction Financial Management Association, brings his years of experience and unique perspective to this invaluable session. **Advance registration ends December 31, 2021!** Registration is now open: [Register now!](#)

SAFETY NEWS

By Jeff Blomgren
Safety Director at Petticoat-Schmitt Civil Contractors

Training Considerations

When we look at the training required for our employees and supervisors, have we ever made a list of those things that are needed for worksite competency?

Beginning with orientation, as a bases for safety training there are a host of competency requirements for supervisors and for the workforce. Defensive driving, Storm Water Management, CPR and First Aid, Blood borne Pathogens, Silica, Confined Space for entrants and attendants and Confined Space Competent Person, Trenching and Excavation Competent Person, Rigging and Lifting, Advanced MOT and flagger training, Heat Awareness, Back Safety, ladder and scaffolding training, Fall Protection and that's just the beginning. In order to work for certain customers, you have to have additional training, either by internal resources or outside training facilities. These might include job specific training designed by the customer or OSHA training such as OSHA 10 or OSHA 30. More and more of our customers are requiring advanced safety training to work their jobsites and we need to be aware of any changes to those training requirements.

Training amounts to a significant investment in time and resources and there's a commitment to updating the training to match a transient workforce. Our mobile workforce requires a constant training schedule. The "Once and Done" doesn't exist. We may invest a significant amount of time and money in training for an employee and that employee takes the training with them when they leave. Many companies retain the training certification and when the employee goes to the next job they cannot prove they have had the training and in some cases they have to take the training again. While the practice is understandable, it just shifts the cost to the new employer for training that's already been provided.

If we are to keep up with the mandates for training, we need to understand that the training we do today may not be enough for tomorrow. Having a list of training resources available and training "in house" training experts, can relieve some of the cost for the outside resources but that is an investment that needs to be selective. Training the right person requires us to look at the abilities of the trainer to be sure that they are capable beyond their area of expertise. That means, a good fit. We also need to realize that there is a cost in terms of manpower and resources to be effective in the training process. It's not just as simple as, "sticking pipe in the ground" any more. We are investing in raising the educational level and expertise of our employees and rapidly becoming more vocationally skilled trade experts. Not just anyone can do what we do.

“Holding Our Own in 2021”

By Kari Hebrank, Executive Vice President

There is no doubt the past year presented unusual challenges as we collectively continue to climb out of the pandemic. From trying to remember to “mute” ourselves on Zoom calls, to planning for in-person events with social-distance protocols to handling worker shortages, we’ve all been “holding our own.” Your state association has also been “holding our own” as we look back at our accomplishments during 2021:

- We passed our priority legislation (HB 53) relating to the public works projects to remove the “50 percent or more state- appropriated funds” funding threshold on competitive solicitations for construction services, thus increasing the prohibition on local preferences to any project that is state-funded.
- We passed a law prohibiting any government entity that contracts for a public works project from preventing a certified, licensed or registered contractor, subcontractor, or material supplier from participating in the bidding process based on the geographic location of its headquarters or offices or residences of its employees.(HB 53)
- We passed a bill to ensure our members could file a Notice of Commencement and protect their lien rights when public records are redacted (HB 781) and defeated a bad lien law bill that would have affected lien waivers. (SB 622)
- We helped obtain \$111.7M for Wastewater Grants and \$111.7M for Resiliency Projects by redistributing the documentary stamp taxes, while still preserving \$200M for affordable housing needs (SB 2512). We also secured \$500M for Wastewater Grants and \$500M for Sea Level Rise projects; \$734M for Water Restoration Assistance Programs, including \$10M for septic- to -sewer conversion; \$11M for Small County Wastewater Treatment grants; \$135M for the Drinking Water Revolving Loan Program; and, \$211.2M for the Wastewater Revolving Loan Program;
- We passed a law that allows students in pre-apprenticeship or work-based programs to be deemed state employees for purposes of workers’ compensation coverage for medical care. (SB 366)
- We expanded impact fee credits for exactions and capped new impact fees and limited increases to no more than once every four years, but provided a “relief valve” for government entities if extraordinary circumstances evolve. (HB 337).
- We protected our member companies from COVID-19 lawsuits from employees. (SB 72)
- We held our first-ever Virtual Legislative Days Event that spanned a week with multiple Chapters participating along with key state leaders and lawmakers.
- We increased revenues from our Annual Bass Tournament and awarded \$50,500 in scholarships to a total of 20 deserving students.
- We increased networking opportunities, revenues and attendance at our President’s Cup golf event and second-annual Cornhole Tournament.
- Lastly, but importantly, we contributed to 40 legislative campaigns during 2021.

In 2021, NUCA's Capitol Hill advocacy campaign delivered to the utility construction industry an unprecedented level of new funding for water, broadband, and highway infrastructure projects. Over \$200 billion in federal funding is now available for industry projects over the next five years.

Accomplishments 2021

Historic Levels of Infrastructure Funding Secured. NUCA's advocacy campaign secured a November passage of H.R. 3684, the Infrastructure Investment and Jobs Act. This \$1.2 trillion bill will fund \$30 billion in new water and wastewater projects, \$65 billion to modernize broadband systems, and deliver \$110 billion for new highway and bridge projects. Billions more for ports, airports, electric vehicle, and other core infrastructure projects are also being sent to all 50 U.S. states. As a result of our advocacy, NUCA member companies now have access to an extraordinary level of new resources for community public works projects between FY2022 and FY2026. To see how much your state will receive, go to www.nuca.com/fixwater.

Washington Summit Advocacy Program. Because NUCA recognized early that the national economic situation demanded larger public works spending, we held in 2021 two advocacy summits for members to meet with their federal lawmakers. Over the course of our virtual (May 26) and in-person Washington Summits, NUCA members held nearly 200 advocacy meetings with their lawmakers. NUCA closed the deal on November 3 when more than 75 members traveled to Capitol Hill to urge their lawmakers to pass H.R. 3684, which the House passed two days later.

New Member Benefits and Membership Growth. The expanding range of new business benefits such as our CLC Lodging traveling employee program and the growing network of NUCA Chapters are reflected in NUCA's annual membership numbers. In 2021, NUCA membership grew to 1,800 member companies, achieving over a 6.5% growth rate as the association expands into new regions and states. Overall, NUCA added over 260 new members and attained a 90% renewal rate, demonstrating the reliable satisfaction members receive from more NUCA benefits and services.

NUCA Covid-19 Flu And Vaccine Information Center. NUCA continued to deliver instant resources to their members via their webpages for pandemic business recovery, available federal loans, and the Administration's vaccine mandate program. Throughout the year, NUCA regularly posted the latest information on its www.nuca.com/panflu website.

Industry champion and House Transportation & Infrastructure Committee Chairman Rep. Peter DeFazio (D-OR) accepted NUCA's 2021 "We Dig Award" on the steps of the U.S. Capitol Building during our Fall Washington Summit.

Safety & 2021 Trench Safety Stand Down (TSSD) Week.

Safety never takes a rest, so the results of the 2021 TSSD Week, June 14-18, sponsored by NUCA and the Safety Ambassadors Club, remained encouraging as this popular NUCA program continues to expand. More than 22,000 workers on 2,200 jobsites from 340 organizations participated this year. Our revamped Safety Directors Forum and new Train-the-Trainer programs are highlighting the leadership of our new safety director Mike Flowers.

Greatly Expanded NUCA Advantage Benefits Program.

Our well-liked healthcare benefits program expanded this year through our partnership with Memberfy, a nationally recognized business services and benefits company. NUCA Advantage now offers to members open-access health-care, dental, and vision coverage, life insurance, 401(k) retirement plans, human resources apps, payroll solutions, learning management system access, OSHA compliance logs, and much more via www.NUCAAdvantage.com.

Thanks to our 2021 National Partners for their generous support throughout the year!

Our new NUCA Advantage program includes one-stop selections for member's healthcare, 401(k) plans, HR & OSHA compliance, and industry education needs.

Webinars On Latest Industry Topics. NUCA continued its popular Webinar Wednesday series throughout the year. Held the first week of every month, the 30-minute webinars addressed supply chain issues, our new NUCA Advantage healthcare and HR benefits program, emerging industry technologies, mental health issues, and equipment and safety seminars.

NUCA WINS App. Our incident recording app NUCA WINS added several new features this summer, making it even more useful for industry members to document jobsite situations, employee health, and other site-specific needs. NUCA WINS 2.1 can easily operate on a supervisors' mobile device to document situations at the point-of-occurrence. The NUCA WINS app (www.nucawins.com) can eliminate the inaccuracy of completing incident reports.

NUCA's Growing Chapter Network. NUCA welcomed in 2021 new chapters in Kentucky and Arizona. Several other chapters, including two in Texas and one in West Tennessee, are rapidly being formed with new members joining weekly. Our 32 Chapters provide members local networking events, state advocacy, safety training, and much more.

NUCA 2021 Convention & Exhibit. Held in early February at the sunny Naples Grande Beach Resort in Naples, Florida, this event for NUCA members proved to be a welcome respite from the months of pandemic isolation. NUCA's new leadership was sworn into office and our two new chapters were formally inducted, opening up a year of promising membership growth and new membership programs.

Scholarships. NUCA awarded three scholarships to students of industry members through its Foundation for Education and Research.

NUCA Staff. NUCA welcomed three new staff this year. Our new director of safety, education and training Mike Flowers joined the staff in August. NUCA's membership programs expanded during the fall with the hire of George Hamilton as director of membership development, and Lauren Hensley as membership director. All three are working to expand our safety & training, and membership services to more members and their employees.

We're glad you're part of America's premier utility contractor industry association!

NUCA welcomed to the family at our 2021 Convention two new Chapters, NUCA of Kentucky and NUCA of East Tennessee.

As a NUCA member, you have access to a vast amount of industry news and information. Please visit our Website, www.nuca.com. We're also on Twitter (@NUCA_National), Facebook (NUCA1964), LinkedIn (NUCA National), Instagram (NUCA_National), and YouTube (NUCA National).

NUCA's membership department can be reached via 703-358-9300, or by e-mail to Lauren Hensley, lauren@nuca.com. We want to make sure you get the most out of your NUCA National and Chapter membership in 2022 and the years beyond.

JACKSONVILLE ICEMEN TICKET ORDER FORM

Friday, February 25, 2022

Tickets are \$40 each and include a \$20 food voucher, access to pre-game space to socialize with other guests and an Icemen group gift of the game. Doors open at 6:00 pm and game starts at 7:00 pm. Please provide mailing address for tickets. In order to allow time to mail tickets, please submit your order no later than Friday, Feb. 11th.

HASKELL

JANUARY FEATURED SPONSOR

ABOUT OUR COMPANY

Local: The Jacksonville office of Engineering Consulting Services (ECS) is a premier provider of geotechnical engineering, construction materials testing, environmental consulting and facilities engineering services. Our laboratory is AASHTO Accredited and CCRL Certified to provide testing of soil, concrete, aggregate, hot mix asphalt, bituminous materials, and sprayed fire-resistive materials. We have one of the largest fleets of drill rigs in the southeast that are certified and proficient at drilling projects both on land and over water, including a GeoProbe® with direct push capabilities.

Florida: ECS Florida, LLC is one of the operating entities of the ECS Group of Companies with office locations in Jacksonville, Gainesville, Daytona, Orlando, Tampa, West Palm Beach, Fort Myers and Brunswick, Georgia. With more than 190 employees, ECS Florida, LLC is equipped to help projects from conception through construction for both the private and public sectors.

Company: Founded in 1988, ECS currently operates in over 75 locations throughout the Mid-Atlantic, Midwest, Southeast and Southwest. Utilizing the strengths, experience and expertise of more than 2,000 staff across the company, ECS is able to save our clients time and money.

OUR VALUE

ECS embodies its philosophy of “Helping you build while helping you save” by using technology and experience to assist clients in the development of cost-effective and practical solutions. For over three decades, our value engineering consulting has resulted in our clients saving millions of dollars on projects.
